## Geography - Themes of Geographic Inquiry - Grade 7

### Battle for the Trees
- **Code:** 363.7 63902
- **Format:** VHS Video
- **Duration:** 57 min
- **Publisher:** National Film Board of Canada

This video is a balanced look at the needs of the forestry workers and the concerns of the environmentalists, and it offers some practical solutions that balance economic needs with the preservation of these ancient forests. No Other Versions Available

### Beating the Elements
- **Code:** 551.5 64335
- **Format:** VHS Video
- **Duration:** 30 min
- **Publisher:** Visual Education Centre

Through the eyes of disaster victims, we look at what happens when the weather can’t be controlled or predicted, and disaster strikes. No Other Versions Available

### Biodiversity / Garbage (Bill Nye)
- **Code:** 577 64549
- **Format:** VHS Video
- **Duration:** 50 min
- **Publisher:** Magic Lantern Communications

Biodiversity: In any given environment there are hundreds of varieties of plants and animals living together, creating ecosystems. Bill nye sets up office in an Ocean, forest and field to Show what happens when one link falls out of nature’s chain. Garbage: Bill nye exposes the vast amounts of non-biodegradable waste we humans create. No Other Versions Available

### Can Polar Bears Tread Water?
- **Code:** 363.7 65228
- **Format:** VHS Video
- **Duration:** 60 min
- **Publisher:** Thomas Howe Associates Ltd.

Climate is considered by many scientists and politicians to be second only to nuclear war in its potential for disrupting the human race. Shot around the World in the USA, China, Russia, Canada and the UK, this new documentary analyzes the time scale of climate change and illustrates how people should respond to the dangers. In Canada, the documentary focuses on the fight of a group of Canadian native Indians against deforestation. There’s no doubt that if the green house effect is allowed to go unchecked, then polar bears May literally have to tread water. Global warming will have melted the ice. No Other Versions Available

### Canada: The Landscape and the Climate
- **Code:** 917.1 67613
- **Format:** VHS Video
- **Duration:** 15 min
- **Publisher:** Ethos Limited

The landforms and their origins, the types of landscapes relating to economic activities, and seven climatic regions of Canada in terms of precipitation, temperatures and vegetation, are studied. No Other Versions Available

### Chernobyl: The Awakening (Part 1) (Man Alive)
- **Code:** 363.7 66005
- **Format:** VHS Video
- **Duration:** 30 min
- **Publisher:** Canadian Broadcasting Corp.

Five years ago, the biggest nuclear disaster in history shook chernobyl. Today, as Ukraine is rocked by political turmoil, we revisit this documentary to examine the impact of the Chernobyl disaster on the people, the environment, and the world. No Other Versions Available

### Cyclone
- **Code:** 550 67506
- **Format:** VHS Video
- **Duration:** 60 min
- **Publisher:** National Geographic Society

Around the globe, hurricanes, tornadoes, and typhoons stike without mercy and often without warning. National geographic chronicles some of the World’s most shocking storms with footage and scenes of real life drama: Roofes ripped from houses, trees snapped like toothpicks, and trucks tossed about like children’s toys. From twisters sweeping across the midwest’s “tornado alley,” to the force of Florida’s hurricane Andrew, to the powerful typhoons of the pacific, the forces of nature are among the most powerful forces on earth. No Other Versions Available

### Earthquakes in Canada?
- **Code:** 550 62238
- **Format:** VHS Video
- **Duration:** 15 min
- **Publisher:** Tvo Ontario

This documentary gives a detailed explanation of what causes earthquakes, and stresses that Canada is not immune to this kind of natural disaster. It examines the methods that seismologists use to predict and measure earthquakes, and provides advice to viewers on what they can do to protect themselves. No Other Versions Available

### Fish Sustainability
- **Code:** 338.3 64653
- **Format:** VHS Video
- **Duration:** 20 min
- **Publisher:** National Film Board

A look at the problems of the Canadian fishing industry. No Other Versions Available

### Fish Wars
- **Code:** 333.7 65505
- **Format:** VHS Video
- **Duration:** 47 min
- **Publisher:** National Film Board

Fish wars examines the various stages of fish farming and presents different points of view on each issue that arises. The controversy is particularly sharp because aquaculture represents a change from extracting a resource to producing one; hunters are being replaced by farmers, and traditional values and ways of life are in jeopardy. No Other Versions Available

### The Five Themes of Geography - Geography Tutor
- **Code:** 70458
- **Format:** VHS Video
- **Duration:** 16 min
- **Publisher:** McIntyre Films

This video looks at absolute location, relative location, human or cultural place characteristics, an environment, physical place characteristics, a region. No Other Versions Available

### The Greatest Lakes
- **Code:** 363.7 65724
- **Format:** VHS Video
- **Duration:** 30 min
- **Publisher:** Visual Education Centre

The ice age left five sparkling freshwater seas which we now call the great lakes. These lakes alone contain one-fifth of all the freshwater on the face of the earth, some 65 trillion gallons. In the past 200 years, settlers along the shores have altered the ecosystem with industry and towns. Many environmentalists suggest that this is a turning point for the United States and Canada requiring an immediate solution. No Other Versions Available

### How Much Is Enough?
- **Code:** 363.7 65929
- **Format:** VHS Video
- **Duration:** 29 min
- **Publisher:** Thomas Howe Associates Ltd.

A logging blockade in the tsitika valley November 1990 further inflamed the controversy over how B.C.’s forests should be managed. "How much is enough?" Examines what's at stake for the people caught in this conflict. This documentary features forest workers from MacMillan Bloedel and environmentalists who share why they feel the lower tsitika valley should be logged or preserved. No Other Versions Available

### Living City (Nature of Things)
- **Code:** 330.9 66377
- **Format:** VHS Video
- **Duration:** 46 min
- **Publisher:** Canadian Broadcasting Corp.

This documentary gives a detailed explanation of what causes earthquakes, and stresses that Canada is not immune to this kind of natural disaster. It examines the methods that seismologists use to predict and measure earthquakes, and provides advice to viewers on what they can do to protect themselves. No Other Versions Available
Understanding Places

71964 VHS Video
21 min JI 2001 Kinetic Video Inc.
Geographers use a two-part strategy to find out about a place. The first is to look at a place's physical environment - its landforms, climate and natural resources. The second part focuses on the place's people - their language, their numbers (population), economy, religion, political system, art and music.
